

# NEW FOR 2023-2024 School Year

## Expanded Program Offerings and Improved Platform Access

The new school year is the perfect time for a renewed focus on students' mental health needs. We have significantly expanded our product offerings so that you can best support your students.

### 5 New Elementary Module Offerings

Built with our younger learners' needs in mind and clinically developed using therapeutic frameworks and evidence-based practices, five new modules are now available for students in grades 1-5.

**1. Aggression:** Helps learners understand aggression, the importance of controlling it, and strategies for handling anger and unsafe behaviors in a healthy way.

**2. Erin's Law:** Informs students about Erin's Law. Learners become familiar with the Touching Rule, safe and unsafe touch, unsafe secrets, unwanted and unsafe pictures and videos, and healthy boundaries. They will also learn about help-seeking behaviors and how to communicate their needs effectively.

**3. Hygiene:** Students learn about different aspects of physical health care, the importance of being hygienic, and how to practice healthy habits.

**4. Making Friends:** Students learn about types of friendships, why making friends is important, how to recognize healthy vs. unhealthy relationships, and how to make friends through social skills and authenticity.

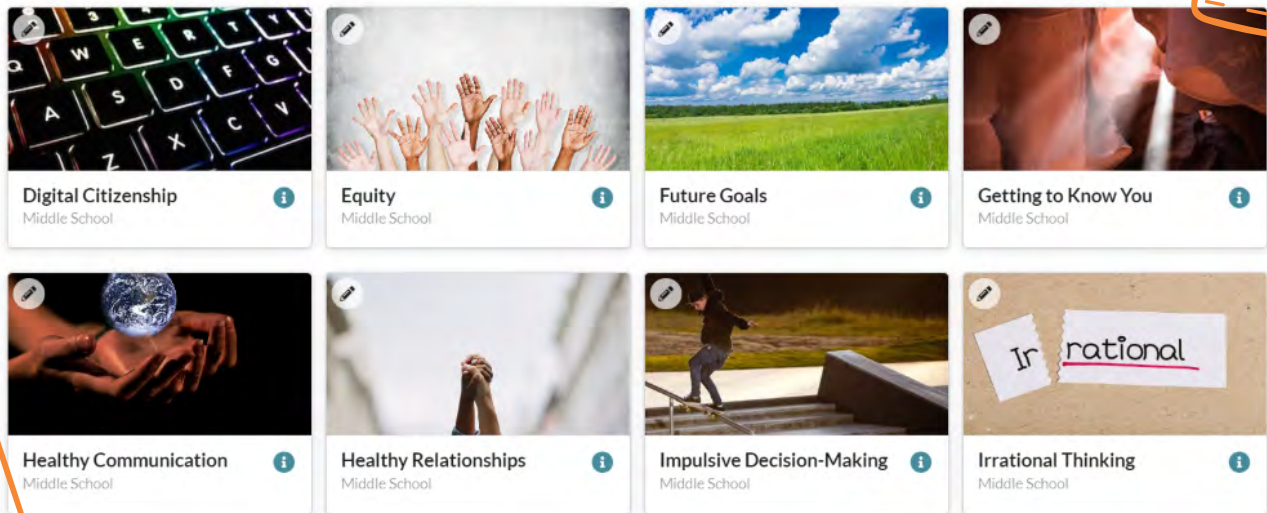

**5. Refocus:** Helpful for mental and behavioral stabilization purposes, and is a great way to keep students in the classroom while they calm down and learn about their challenges. The content will help them better understand their feelings, develop coping skills, and return to learning faster.

## Complete Module Suite for Middle School

BASE Education now offers a module collection specifically designed for students in grades 6-8. All modules reflect the unique needs of the middle school learner and include:

- ✓ More concise content with relatable examples and images, leveled vocabulary and topic discussion, and developmentally appropriate lines of questioning.
- ✓ Accompanying educator guides, parent/guardian versions, and instructional versions.
- ✓ Twenty-three of the new modules begin with a new introductory video.
