

BASEline: A Universal Assessment Screener

Identify and Evaluate Individual Needs

For Tier 2 and 3 Students in Grades 6-12

BASEline is a powerful self-reporting tool to identify students' mental health competencies across four categories and measure growth, allowing teachers to personalize instruction.

With the **BASEline Assessment Screener**, schools can assess their students' growth at predetermined intervals throughout the year to ensure that students are achieving desired outcomes.

It is recommended that students take the BASEline assessment three times per year, which provides data points to gauge growth across the following four categories.

Behavioral Infractions

Engagement

Academic Self Confidence

Social Connectivity in School

How BASEline works?

Pre-Assessment: Each student answers simple questions about their behavior, engagement, academic confidence, and social connectivity.

Course Recommendations: Once students take the BASEline assessment, they will be assigned a personalized pathway of course modules designed specifically for improving the identified areas of need.

Post-Assessment: Upon completing the assigned modules, BASEline is re-administered to show pre- and post-test results. Administrators are dynamically informed with charts and graphs as to the effectiveness of the instruction.

BASEline: A Universal Assessment Screener

Measure Student Growth Over Time

Why BASELINE Matters?

Administrators and staff are empowered with the ability to easily report on program outcomes. Students are provided insight into areas of personal growth. As your partner, we assist you in tracking and reporting on your program initiatives' effectiveness at the district, campus, and/or student level.

Districts/Schools:

- Monitor the impact your initiatives have on students.
- Determine if school is progressing toward programmatic goals.
- Look for disparities in the domains and reflect on the type of support those subgroups of students should receive.
- Design and provide MTSS / Tiered supports schoolwide.
- Make decisions on where to invest in additional resources, training, and support.

Mental Health Practitioners/Educators

- Simplify IEP compliance through screening, data capture, and personalized modules. All student participation and assessment metrics are documented in the platform.
- Understand and meet students where they are.
- Identify intervention strategies for individual students (Tier 2 and 3).
- Monitor the impact and progress over time.

WHAT THE STUDENTS ARE SAYING

According to a study conducted with the assistance of Excelsior Youth Centers:

87% Students feel successful when doing BASE coursework

71% Students think about the BASE coursework on their own time

77% Use what they've learned from BASE in their everyday life

81% Students say that BASE enables them to talk about things with their therapist or counselor that they couldn't before they used the program

About BASE Education

BASE Education, a 7 Mindsets solution, is a comprehensive student mental health platform that offers psychologically safe curriculum and personalized learning pathways for students needing Tier 2 and 3 behavioral supports. Founded in 2014, BASE Education is recognized by CASEL for its high-quality content, innovation, and other implementation supports, including a built-in warning system for crisis intervention. Since its launch, BASE Education has been used by more than 500,000 students nationwide.
